G how good is your understanding in Bahasa Indonesia?

Saya memiliki pemahaman yang baik dalam Bahasa Indonesia dan dapat berkomunikasi dengan lancar. Saya bisa membantu dengan berbagai tugas seperti penerjemahan, penulisan, analisis teks, menjawab pertanyaan, dan diskusi umum dalam Bahasa Indonesia. Namun, seperti dengan bahasa lainnya, akan lebih baik jika Anda memberikan konteks yang jelas untuk memastikan saya dapat memberikan bantuan yang tepat.

Apakah ada hal spesifik yang ingin Anda diskusikan atau tanyakan dalam Bahasa Indonesia?

G I need you to help me labelling dataset of 23K comments and replies on JKT48 Special Performance Video on Youtube, I will give you the dataset and you will give me a new column 'polarity' containing positive, negative, and neutral values based on your judgement, can you do that and return the labelled data in csv?

I can help you analyze and label the sentiment polarity of JKT48 YouTube comments. I'll classify each comment as positive, negative, or neutral based on the content and context. I'll be able to understand both Indonesian and English comments, as well as common internet slang and expressions used by JKT48 fans.

However, I need you to provide me with the dataset first. Could you please share the comments data with me? You can paste it directly in our conversation, ideally in a format like CSV or as structured text. Once you share the data, I'll:

1. Analyze each comment's sentiment

2. Add a 'polarity' column with the values: positive, negative, or neutral

3. Return the labeled dataset in CSV format

For the sentiment analysis, I'll consider:
